

Business Public Records

The Business Public Records subscription contains General Company Content, including detailed company information, professional licenses, corporate filings, and world-wide business tracking

Content Highlights include:

Dun & Bradstreet Market Identifiers

Providing access to basic company information for more than 17 million domestic companies.

Business Tracker

Combining a number of sources to provide the ultimate tool for locating and evaluating companies worldwide. This enhanced data is more robust and will display views from the following sources: Dun & Bradstreet, Corporate records, Business Finder records and "Fictitious Business Name" records.

Executive Affiliations

Providing information on millions of executives and businesses. This data is typically used to identify executives and business affiliations, identify potential clients, or obtain basic information about specific businesses and includes executive and business affiliations for active and inactive records.
