

Gale Company Profiles

Gain access to over 90,000 profiles on public and private international companies

When you need information about a specific company, or a group of companies, look no further than the Westlaw Gale Company Profiles. Company Profiles can provide over 90,000 dynamically produced reports on public and private international companies, including a comprehensive overview of a company and its operations, telling you everything you need to know.

The database includes not only US Public companies, but also the hard-to-find private companies and non-US companies as well, adding up to coverage of more than 400,000 companies over all. This kind of information is difficult, if not impossible, to find on the Internet.

Up to 12 Modules of Information

A complete Company Profile report may feature up to 12 modules of information, depending on the company, size of operations, location and whether it is public or private. The modules include:

- Key People
- Company Overview
- Financial Statement Overview
- Wall Street Views
- Divisions and Subsidiaries
- Products and Brands
- Industry Overview
- Industry Group Comparison
- Business Associations
- News and Information
- Corporate Chronologies

With the modules you can search and find extensive information, ranging from key people in a company, to "Wall Street Views", which are summaries of analyst reports from Nelson's Brokerage Reports service.

The Industry modules are particularly helpful in efforts to understand the market value, market volume, competitive analysis, market forecasts, or more within an industry.

The news and information component is also extensive, with reference to approximately 2,500 periodicals. In the absence of news articles on smaller companies, up to five industry articles based on that company's SIC code will be displayed.
